APPENDIX B
Survey Forms

Appendix B presents additional information on the identified resources that are officially listed in the NRHP, or are recommended eligible for inclusion in the NRHP individually or as a contributing element in an NRHP-eligible district. The form for each resource is limited to a single page, and the results are presented in county order, moving north to south.

Besides including information about each resource’s physical attributes, history, and preservation/designation recommendations, the form contains photographic documentation that captures the resource’s salient features. Each form contains a satellite image of the resource using *Google Maps* and includes a pin that notes the resource’s location. The survey also includes up to three images of each resource, one of which may be a historic photograph (if available) identified during research efforts.

The thumbnail includes an embedded link that can be used to open a high-resolution image in a web-browser. This image can be downloaded and saved.
