*SurveyMonkey cumulative results provide averages based on the number of respondents. This approach can be misleading in some reporting categories, so we provide a “**Relative Average**” based on the number of respondents who reported a non-zero amount for the line item.

For example, SurveyMonkey generates a \$6,750 average for CHC county allocations for museums based on the 169 respondents. However, only 38 CHCs reported a non-zero county allocation for museums, making \$30,020 the Relative Average based on amounts provided by those 38 CHCs. FYI—reporting question 29 indicates that only 35 reporting CHCs operate a museum, which is why most CHCs listed a zero-dollar county allocation for museums.
